

High Voltage HVAC
Heater Air-Conditioner

P-5075

Reduce Downtime and Increase Operator Safety.

The Polar P-5075 High Voltage HVAC Heater Air-Conditioner is built to withstand the harshest environments around the world! Perfect for a wide variety of industries, this unit is designed to perform consistently in the roughest surroundings and extremely high-temperature conditions.

With proven longevity using high-quality parts, the P-5075 will save you money on spare parts, lost time between failures and replacement part serviceability!

Make Your Equipment ISO 23875 Compliant

The P-5075 is designed to allow for the seamless integration of Pressurization and Filtration technology to make your cab ISO 23875 compliant! Available to come pre-installed and controlled right through the HVAC unit!

Ask us how to make your cab certified today!

FEATURES & BENEFITS

- 45" wide x 53.5" long x 22" tall; weight ~450 Lbs
- 65,000 Btu Cooling @ 75°F WB
- 6 kW electric heating
- Stainless Steel Housing
- Antimicrobial Copper/Copper Coils
- Dual 40,000 hour sealed brushless evaporator fan IP68/IP6K9K
- Dual 40,000 hour sealed brushless condenser fan with automatic reverse mode to clean coil in high dust environments IP68/IP6K9K
- Polar digital controller
- Seamless integration of Sy-Klone technology for ISO 23875 certification

AVAILABLE OPTIONS

- Forward only condenser fan
- Air-conditioning only
- Sy-Klone Cab Pressurizer, Recirc and Monitor
- 208-240 VAC 3 PH 50/60 Hz
- 460-480 VAC 3 PH 50/60 Hz
